HIV/AIDS Surveillance Report

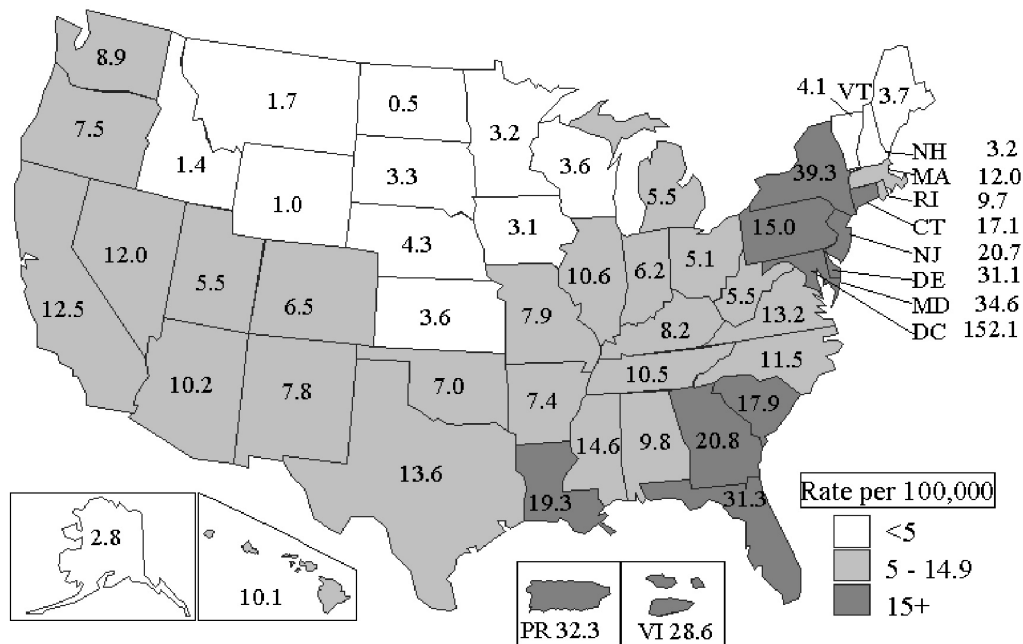

MID YEAR REPORT

Volume 9

Contains data from reports received through June 30, 2003

Number 1

U.S. AIDS Rates, Reported in 2001 *

*Source: CDC - HIV/AIDS Surveillance - General Epidemiology L178 Slide Set #11

Change in Publication Schedule

This NHHSS publication has changed from being quarterly to biannual. The next issue will be the 2003 End of Year Report.

Sex/Needle Partner Location/Notification Services in Nebraska

All current and previous sex or needle-sharing partners of persons with HIV disease should be located and notified of their possible exposure to HIV. To receive a brochure detailing partner notification considerations, or for further information, contact Dan Harrah or Phil Medina at 402-471-2937 or call your local health department and ask for partner notification services.

Reporting Regulations Revised

Nebraska's communicable disease regulations have been revised and were effective January 28, 2001.

- Health care providers are now required to report any pregnant woman with HIV disease receiving medical care as well as any child under 19 months of age who was born to a woman with HIV disease.
- Laboratories must now report positive confirmed HIV antibody test results and CD4 counts under 800, HIV indeterminate Western blot results, HIV RNA PCR viral loads that are detectable or below detectable limits, as well as positive results from HIV PCR DNA tests, HIV p-24 antigen tests, and HIV viral cultures.

HIV Disease Cases (not AIDS)^b

DEMOGRAPHIC CATEGORIES		YEAR ^a REPORTED					TOTAL	
		Pre-2000 ^c	2000	2001	2002	2003	Number	%

	Pediatric	6	*	*	*	*	7	1
	Risk Not Identified	60	12	21	14	7	114	19
TOTAL HIV CASES BY YEAR		388	53	81	48	19	589	100

Technical Notes:

This table represents persons reported with HIV disease (not yet AIDS) from hospitals, physicians and laboratories. It may not include all persons living in Nebraska who have HIV disease. Many persons with HIV disease have not sought testing and are not aware of their status.

These numbers do not include those persons who have chosen to be tested anonymously at State-funded counseling and testing sites.

Some HIV disease cases diagnosed prior to 1995 are included in this table. They represent persons who sought testing and/or treatment in Nebraska prior to the implementation of HIV reporting in 1995. These numbers may not represent all such persons, since retroactive reporting is voluntary on the part of hospitals, physicians and laboratories.

If the initial report by a physician indicated that the patient at that time had AIDS, that person is included in the AIDS Morbidity table on the next page.

When a person is initially reported with HIV disease, then later diagnosed with AIDS, that person is deleted from this table and added to the table on the next page.

In the Risk Categories

Heterosexual Contact includes heterosexuals who know that one or more of their sex partners:

- used injection drugs,
- was a man who had sex with men,
- was a person with hemophilia,
- received blood transfusion or transplant and is diagnosed with HIV or AIDS,
- or is a person diagnosed with HIV or AIDS, risk not specified

Pediatric includes persons less than 13 years of age.

Risk not identified includes:

- persons whose risk was not identified at time of initial report,
- persons who died before risk could be determined,
- persons who were lost to follow-up,
- persons who declined interview, and
- persons who do not report one of the other exposures after interview

Sometimes two or more exposures are reported for one case. This table is consistent with the CDC hierarchy of exposures.

*Total number of reported HIV or AIDS cases are three or less. Number of cases less than 4 are not entered to protect the privacy of individuals with HIV disease.

^aCases reported during any given year may have been diagnosed in previous years, therefore these data are not suitable for trend analysis.

^bThe total for each demographic category equals the total for each column.

^cThe effective date for HIV reporting in Nebraska was July 10, 1995; implementation of active HIV surveillance was September, 1995.

How to Report HIV/AIDS/CD4+ Counts

Physicians, hospitals and labs in Douglas County:

send reports to:

Epidemiologist
Douglas County Health Department
1819 Farnam Street, Room 401
Omaha, Nebraska 68183
To be opened by addressee only

For information call: 402-444-7214

Physicians, hospitals and labs in Lancaster County:

send reports to:

Communicable Disease Coordinator
Lincoln-Lancaster County Health Department
3140 N Street
Lincoln, Nebraska 68510-1514
To be opened by addressee only

For information call: 402-441-8053

Physicians, hospitals and labs in all other counties:

send reports to:

Nebraska Department of Health & Human Services
Tina Brubaker, Surveillance Coordinator
Department of Regulation & Licensure
Communicable Disease
P.O. Box 95007
Lincoln, Nebraska 68509-5007
To be opened by addressee only
For information call: 402-471-0360

To obtain HIV reporting forms, for general surveillance information, for assistance in determining HIV/AIDS case criteria, or to initiate a report, call: Tina Brubaker at 402-471-0360

AIDS Morbidity^{a,b}

DEMOGRAPHIC CATEGORIES		YEAR REPORTED								TOTAL	
		Pre-1997	1997	1998	1999	2000	2001	2002	2003	Number	%

TOTAL AIDS CASES BY YEAR		786	90	71	64	79	73	71	31	1265	100

^aTotal number of reported HIV or AIDS cases are three or less. Number of cases less than 4 are not entered to protect the privacy of individuals with HIV disease.

^bCases reported during any given year may have been diagnosed in previous years, therefore these data are not suitable for trend analysis.

^cThe total for each demographic category equals the total for each column.

Data collection and publication are made possible through funding from The Centers for Disease Control and Prevention,
U.S. Department of Health & Human Services, under Cooperative Agreement U62/CCU706242

AIDS Mortality

STATUS	Pre-1997	1997	1998	1999	2000	2001	2002	2003	TOTAL
Known to be Dead	606	29	17	12	13	7	11	1	696
Alive/Status Unknown	180	61	54	52	66	66	60	30	569
TOTAL AIDS CASES BY YEAR	786	90	71	64	79	73	71	31	1265

Number of HIV Cases Reported in Nebraska in 2002 by Health Planning Region

Statewide Total = 50 cases

*Total number of HIV Cases are 3 or less

HIV/AIDS Surveillance Program

Nebraska Department of Health and Human Services - Regulation & Licensure

Rates are calculated by dividing the total number of HIV infections or reported AIDS cases which occurred in the population during a specified period of time (*i.e.*, the numerator) by the total population (*i.e.*, the denominator) and then multiplied by 100,000.

Rates *cannot* be calculated for HIV because the number of HIV cases reported is incomplete and represents only the number of persons found to be HIV-infected by confidential HIV-antibody testing. These numbers do not include HIV-infected persons who have tested anonymously or who have not sought testing.

Rates *can* be calculated for AIDS incidence because most persons with AIDS seek medical care and are then reported as cases by their health professionals. Therefore, because of the completeness of reporting, the number of reported AIDS cases is considered representative of all persons *with AIDS* in Nebraska.

In order to provide a *minimum* estimate of the number of persons in Nebraska known to be HIV infected as of a certain date, HIV reporting data and AIDS data (including mortality data), as of that date, can be added together.

Number of AIDS Cases Reported in Nebraska in 2002 by Health Planning Region

N = 72 / Rate = 4.2
cases / Rate per 100,000

*Total number of AIDS Cases are 3 or less

HIV/AIDS Surveillance Program

Nebraska Department of Health and Human Services - Regulation & Licensure

Confidential and Anonymous HIV Testing Options:

“A person seeking a human immunodeficiency virus test shall have the right to remain anonymous. A health care provider shall confidentially refer such person to a site which provides anonymous testing.” (Nebraska Revised Statute 71-531, Section 3 - note exceptions)

Both confidential (with name) and anonymous testing (without name) are allowed **at** state-funded **Counseling, Testing, Referral and Partner Counseling (CTR/PCRS) sites**. Physicians ordering HIV testing in all other settings may offer confidential testing only but can refer patients to CTRPN sites for anonymous testing at the patient’s request.

Anonymous test results are not included in Nebraska’s HIV/AIDS *Morbidity/Mortality Report*. CDC does not accept anonymous test results as cases.
